

ZİYA ÇAYLAN

Front-end Developer

About Me

I am a front-end developer specialized in JavaScript and React technologies. I have developed projects focusing on user experience. I design and code web pages using front-end technologies such as HTML, CSS, and JavaScript, and also leveraging libraries such as Material ui, Tailwind, Bootstrap, and Chakra UI. I am able to create data-driven web applications using React and optimize web applications using the advantages of a component-based structure. I am currently seeking employment and as an individual who is a team player, enjoys working and open to new opportunities, I am eager to continue my career as a part of your company.

Professional Experience

Bilge Adam Teknoloji / Front-end Developer Intern
04/2022 - 12/2022

Key responsibilities:

- Assisted project teams in designing and developing web pages
- Participated in usability and user experience testing and analyzed results
- Collaborated with team leaders to ensure projects were completed on time and within budget

Next&Nextstar / Mechatronics Technician
08/2009 - 11/2021

Key responsibilities:

- Prepared and maintained a program for tracking technical service product input/output and related activities
